

**Pinal County Post Secondary
CAAG Planning/Research Department
July 2009**

CAAG created the post secondary database based on data provided by Central Arizona College. The post secondary database is an inventory of post high school institutions. The institutions location, current enrollment, expansion plans and enrollment projections are tracked in this database. The database is updated annually and is presently current as of July 2009. The database is maintained using Arc GIS and excel spreadsheets. All data is collected by each CAAG member agency. These files are available upon request through the CAAG license agreement.

This database does not represent a legal survey and is intended for general planning purposes only.
